

Wanzami Android Upload Guide: D-U-N-S Requirement

Why Wanzami needs a D-U-N-S number for Google Play organization upload

Prepared by	Olukayode Soliu

Project	Wanzami Android App Upload

1) What is a D-U-N-S number?

A D-U-N-S number is a unique 9-digit business identifier issued by Dun & Bradstreet (D&B;). It is used globally to identify and verify legal business entities. For Google Play organization accounts, it helps prove that the publisher is a real company, not just an individual profile.

2) Why Wanzami needs D-U-N-S for Android/Play Store upload

- Google Play organization verification requires stronger company identity checks.
- D-U-N-S is used by Google to verify Wanzami's legal business identity for an organization account.
- It helps align organization details across Google Play Console and Google Payments profile.
- It improves transparency and trust for users seeing the publisher information on Play Store.

3) Why you cannot rely only on a personal developer account

A personal developer account is tied to an individual identity. For Wanzami as a company, this creates legal, ownership, and continuity risks. If the business intends to publish under company identity and scale operations, Google's organization onboarding path expects organization verification signals such as D-U-N-S.

- Publisher ownership stays with one person, not the company legal entity.
- Harder governance for teams, auditors, investors, and long-term business continuity.
- Higher mismatch risk between legal business records, billing records, and store identity.
- Potential account compliance friction if organization evidence is requested later.

4) D-U-N-S requirements for a company like Wanzami

- Exact legal company name (must match registration records)
- Official registered business address
- Official business phone number and email
- Business registration/incorporation details
- Organization website/domain
- Authorized company representative details

Typical supporting documents

- Certificate of Incorporation (or local equivalent)
- Tax registration document (if applicable)
- Address evidence (utility/bank/official statement, if requested)
- Authorization letter (if application is submitted by an agent)

5) Recommended process for Wanzami

- 1 Check if Wanzami already has an existing D-U-N-S record.
- 2 If not available, apply via Dun & Bradstreet.
- 3 Ensure legal name/address in D&B; exactly match Google Payments profile.
- 4 Complete Google Play organization verification using matching company data.
- 5 Validate public developer profile details before app release.

6) Timeline and planning

D-U-N-S processing may take days to weeks depending on country and validation completeness. To avoid launch delays, Wanzami should complete D-U-N-S and verification prep before final Android submission window.
